

University of Nagpur – University of Genova an academic cooperation agreement has been signed

November 5th, 2011, Italy

The Datta Meghe Institute of Medical Sciences (Deemed University of Nagpur) has signed an academic cooperation agreement with the University of Genoa's Laser therapy and laser surgery department. Prof. Rajiv M. Borle and Prof. Stefano Benedicenti are eager to begin the exchange in order to mutually grow in their research and training potential. “It is an honour to be able to work alongside academics with such an extraordinary experience in medical laser applications. We hope that dentists and doctors all over the region will benefit from the training possibilities that this agreement will bring”,

says Prof. Rajiv M. Borle. This milestone for laser dentistry in India is supported internationally by doctor smile dental lasers. “The organization of the training sessions is made possible by the scientific and professional collaboration of seven different professional training centres in India, that will promote the institution of a laser master course,” says Alessandro Boschi, export manager of the doctor smile dental laser brand. Locally Mr. Prashant Doctor (Alpha Omega enterprise) and Mr. Neeraj Vaze (Kshitij Enterprise), doctor smile's Indian partners, will supply service and technology to the training and research facilities.
