# QUALITY OF THE TREATMENT FOR VISIBLE RESULTS

Laser technology fits perfectly into the treatment of pathologies related to the vascular area of the face. The Wiser diode laser, thanks to its blue wavelength and its strong affinity with hemoglobin allows it to intervene selectively on the target, resolving quickly aesthetic imperfections such as capillaries, telangiectasias and vascular problems in general.

## MAKE THE DIFFERENCE

## THE BEST SERVICE FOR THE PATIENTS

For a modern dental practice, being able to offer innovative therapeutic solutions is today fundamental. Patients' interest in aesthetics is consistently growing, for that reason a complete technology with specifically studied and clinically tested protocols, allows the professional to not only treat the teeth but also facial blemishes.

The Vasculate handpiece allows to broaden the range of treatments offered to the patients, with treatments minimally invasive, effective and able to satisfy patients' needs.
